Dear Hiring Manager,

My name is The Hung Nguyen, but I go by Ryan Nguyen. I am excited to apply for the UX Design Internship position at Oracle Design. I am currently an undergraduate junior-year student at Bellevue College, expected to graduate in spring 2026 with a Bachelor of Science in Computer Science. My journey in computer science and design has been filled with enriching experiences and self-driven projects, honing my skills and passion for the field.

During my time at Edmonds College, where I graduated with an Associate of Arts in Computer Science, I worked as a Motion Graphic Designer, collaborating closely with supervisors, clients, and co-workers to create cohesive designs. One of my significant assignments involved designing a recruitment campaign for Edmonds College, which included static artwork, flyer designs, and motion graphics. This experience taught me the importance of understanding user needs and designing solutions that address them effectively. Currently, I assist the Computer Science department at Bellevue College as a newsletter designer and editor, shipping quarterly newsletters during the school year.

My technical proficiency spans multiple programming languages, including C, C++, C#, Java, and React JavaScript, which I have utilized for various personal and group projects. I am particularly passionate about projects involving generated computer graphics, such as Project Delta, a 3D Unity Role-Playing Game, and my portfolio website with Three.js integration. These projects reflect my creativity, technical skills, and ability to think strategically and solve complex problems.

I am particularly drawn to Oracle Design because of its commitment to creating experiences for a diverse community of users and fostering an inclusive and collaborative environment. My curiosity towards new technologies and entrepreneurship, combined with my strong problem-solving skills and passion for learning, align well with Oracle Design's values. I am excited about the opportunity to contribute my unique voice and perspective to Oracle's creative team and to further develop my skills in UX & UI Design, Visual/Motion Design, and User Research.

Thank you for taking the time to review my application. It has been a long journey traveling from Vietnam to the United States as an international student, but I am excited to see what comes next. I am truly passionate about software development and design, and I hope to have the opportunity to further explore these subjects with you at Oracle. I look forward to hearing from you and learning more about the position.

Sincerely, Ryan Nguyen
